

ROAMING CLIENTS

NEW

Available for all major desktop & mobile operating systems

HOW IT WORKS

Roaming Clients are endpoint software which provides off-network protection and allows per-machine granularity. Roaming Clients can be automatically distributed across your infrastructure, allowing you to deploy at scale

COMPREHENSIVE COVERAGE

Prevent access to unwanted and malicious content on all devices and all networks

CURRENT PROTECTION

Never worry about having the latest patches or upgrades

FAST FILTERING

Get a faster internet experience by speeding up DNS

DECREASED HELP TICKETS

Bring in rogue devices from off-site personnel

MORE VISIBILITY

Monitor the DNS activity on and off-network

SERVICE PROVIDERS

Earn more value by adding more value to your clients

WHY YOU NEED ROAMING CLIENTS

PROTECT DEVICES

that otherwise could get infected off the corporate network

WASTE LESS TIME

and resources cleaning infected devices

INCREASE PRODUCTIVITY

by restricting access to time-wasting sites
